

=> Power refers to as the Capacity or the Ability of an individual to influence the behavior, decision or actions.

- Most Important Aspect of Power is its Dependency Function.

relying on something else.

Power

Formal

The Official Authority/Power/Right to make decisions or take actions.

Includes Coercive, Reward and Legitimate Power.

- Coercive Power: involves use of threats, force or punishment to get your work done.

e.g.: Threatening to fire an employee.

- Reward Power: involves offering incentives or rewards to motivate others to do your job.

e.g.: Giving Promotions or Bonuses.

- Legitimate Power: based on an individual's position or role within an organization.

e.g.: Manager has the power over employees.

Personal

The Power based on individual's personal traits, skills or relationships.

Includes Expert and Referent Power.

- Expert Power: comes from person's knowledge, skills or expertise.

e.g.: Doctor has the power to make medical decisions.

- Referent Power: comes from person's personal characteristics like charm, charisma and Popularity.

e.g.: Celebrity might have the power to influence or inspire their fans.

⇒ Power Tactics are the strategies people use to translate their power into actions and influence others.

* These depends upon situation, relationships and objectives.

Following are the Power Tactics:

- Legitimacy : Using Formal and Organization's authority and rules.
- Rational Persuasion: Using facts, data or Logical Reasoning.
- Inspirational Appeals: Using emotions, values or hopes/needs.
- Consultation: Involving others in decision-making.
- Exchange: Offering favors and incentives in return.
- Personal Appeals: Using Personal Relationships, Friendships and Loyalty.
- Ingratiation: Sugarcoating or being extra friendly before making request.
- Pressure: Using warning, threats and demands.
- Coalitions: Gaining the support of others to make the target agree.

⇒ Politics refers to as the use of power, influence and social networking to achieve goals.

Following are the Factors influencing Political Behaviour :

1- Individual Factors

2- Organizational Factors

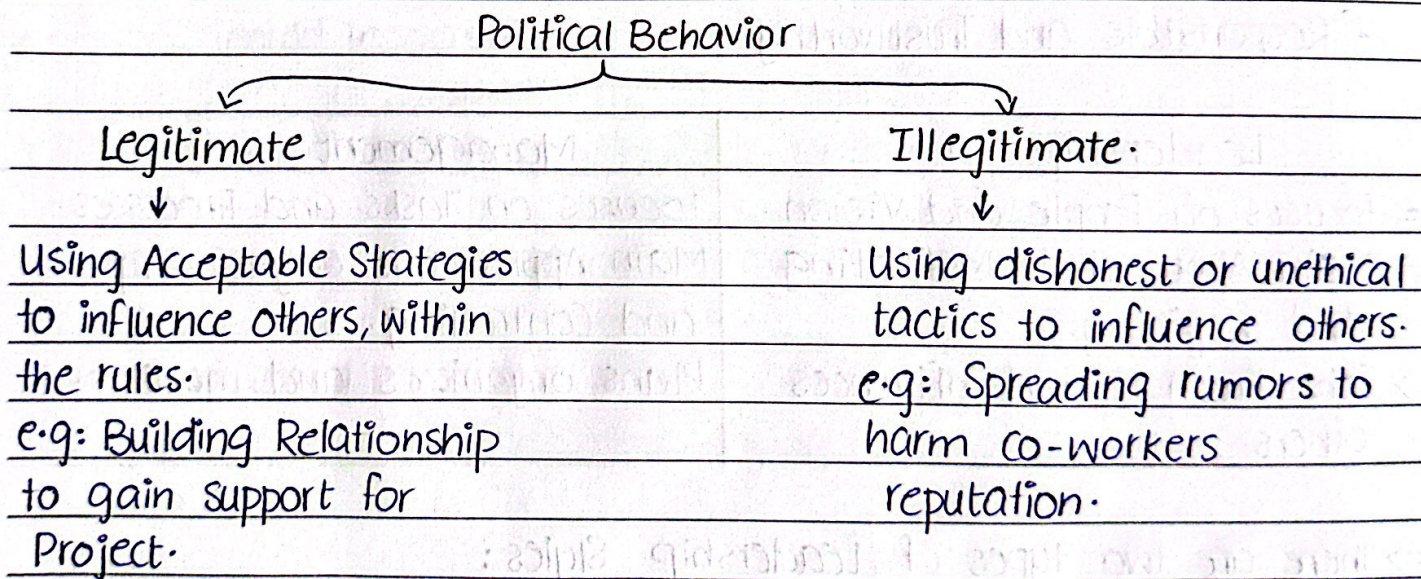

⇒ Individual Factors includes :

- High-Self Monitoring : Observing and Adapting behavior according to the situation.
- Internal Locus of Control : Belief in controlling your own success.
e.g: Taking Lead on Projects to achieve goals.
- Machiavellianism : Manipulating others for personal growth.
e.g: spreading rumors to get ahead.
- Perceived Job Alternatives : Confidence in having other job options, leading to risk-taking.
e.g: Asking for promotion with another offer in hand.

=> Organizational Factors include:

- Declining Resources: Competing for Limited Resources like budget.
- Promotion Opportunities: Chances of getting promoted makes people use Political Strategies.
- Low Trust: People not trusting each other increases political behavior.
- Role Ambiguity: Unclear job responsibilities lead to confusion.
- High Performance Pressure: Stress to achieve results pushes people to use Political Behavior.
- Self-Serving Senior Managers: Leaders focusing on personal growth increases Politics.

=> Political Behavior in the workplace is when people use Strategies or influence to get ahead or achieve their goals, often outside the organization's rules.

=> Following are the techniques used in Organization Politics:

- Attacking and Blaming: Blaming others and not accepting Self Faults.
- Controlling Information: Maintaining Secrets, incomplete, wrong information.
- Forming Coalitions: Creating temporary groups to criticize others.
- Game Playing: Being Disloyal and insincere to organization.

=> A leader is someone who guides, motivates or influence other people to achieve a goal. The Qualities of Leader includes:

- Good Communication
- Positive Attitude
- Motivates Others.
- Wise Decisions.
- Responsible and Trustworthy.

Leadership	Management
=> Focuses on People and Vision.	Focuses on Tasks and Processes.
=> Main Approach is Motivating and inspiring.	Main Approach is Organizing and Controlling.
=> Sets direction and influences others.	Plans, organizes and monitors.

=> There are two types of Leadership Styles:

- Leadership based on Decision-Making and Motivation
- Leadership based on Balancing Team Needs and Goals.

=> Leadership Styles based on Decision-Making and Motivation includes:

- Autocratic Leadership: Leader makes all decisions without team input.
- Democratic Leadership: Leader involves team's opinion in decision making.
- Transformational Leadership: Leader inspires and motivates the team to achieve goals.
- Transactional Leadership: Leader focuses on tasks, rules and rewards for completing goals.
- Laissez-Faire Leadership: Leader gives a lot of freedom with minimal interference to the team.

=> Leadership Styles based on Balancing Team Needs and Organizational Goals:

- People-Oriented Leadership: Leader cares about team relationships and supports team members.
- Task-Oriented Leadership: Leader focuses mainly on achieving goals.
- Participative Leadership: Leader values teamwork and includes everyone in decision making.
- Dictatorial Leadership: Leader focuses only on results, ignoring team moral.
- Sound Leadership: Leader tries to find a balance between getting things done and keeping team happy.

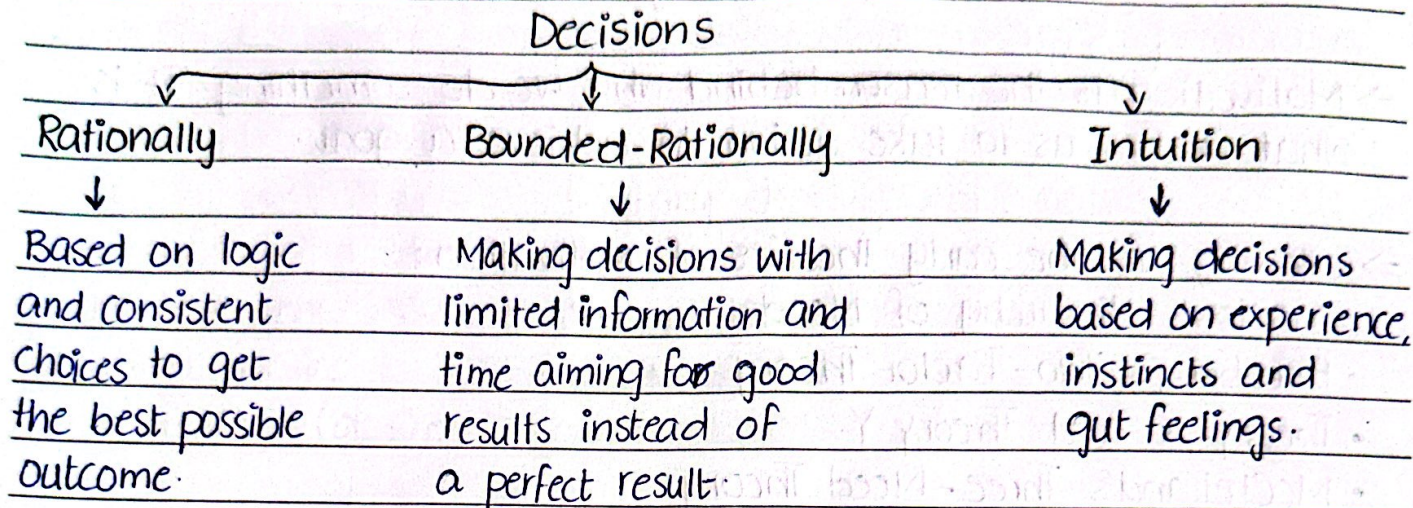

⇒ The Key Traits of Leadership includes:

- Adaptability (Thinking outside the box)
- Flexibility (Adjust with Changes)
- Assertiveness (Not being Aggressive)
- Creativity (Innovation Ability)
- Courage (Face challenges with bravery)
- Trustworthy (Reliable and Dependable)
- Responsible (own mistakes and success)
- Motivational Capability (inspire others)

⇒ Steps for making any decision:

- Identifying a Problem.
e.g: Your laptop is too slow and making work harder.
- Identifying Decision Criteria.
e.g: Think about new laptop's price, speed, RAM, storage, battery.
- Prioritizing the Criteria
e.g: Decide what matters most like Battery be the most and Price be the least.
- Deciding Alternatives.
e.g: Think of different laptop companies like Dell, HP etc.
- Analyzing Alternatives
e.g: Comparing Options to check which fits your needs best.
- Selecting Alternative.
e.g: Picking the best option for Laptop.
- Implementing Alternative
e.g: Getting laptop and setting it up for work.
- Decision Effectiveness
e.g: After a month use, seeing if it solves your problem and improves your work.

=> Everyone in an organization makes decisions, but decision making is particularly important to managers. There are three perspectives on how managers make decisions:

=> Following are the five different aspects of intuitions in decisions:

- Experience-based Decision: Relies on Past Experiences
- Affect-Initiated Decision: Based on emotions and feelings
- Cognitive-based Decision: Involves reasoning and analysis
- Subconscious Mental Processing: Using hidden thoughts and gut feelings
- Ethics-based Decision: Based on personal and moral values.

=> Following are the type of Decisions:

- Organizational Decision: Made by managers for any organization.
e.g: Starting a workshop.
- Personal Decision: Made by individuals but can affect organization.
e.g: an employee/manager resigning.
- Operational Decision: Focuses on current tasks for better efficiency.
e.g: improving work conditions.
- Strategic Decision: focus on long term goals and future growth.
e.g: expanding on new markets

- Programmed Decisions: Regular, routine decisions with set rules.
e.g: Approving Leave Applications.
- Non-Programmed Decisions: Rare, unique decisions without rules.
e.g: Handling sudden crisis.

=> Motivation is the reason behind why we do something. It is what pushes us to take action to achieve a goal.

=> Following are the early theories of Motivation:

- Maslow's Hierarchy of Needs
- Herzberg's Two-Factor Theory
- Theory X and Theory Y.
- McClelland's Three-Need Theory.

=> Maslow's Hierarchy of Needs explains that people are motivated by five levels of needs:

- Physiological Needs (Basic needs for Survival like food, water)
- Safety Needs (Secure needs in life like job, home, health)
- Love/Belonging Needs (Need for Friendships and Relationships)
- Esteem Needs (Need of feeling respected, recognized for achievements)
- Self-Actualization (Achieving Potential and Personal Growth)

=> Herzberg's Two Factor Theory explains what makes people satisfied or dissatisfied at work:

- Motivators (Rewards, Recognition, Achievements, Growth Opportunities)
- Dissatisfaction (No Job Security, Low Salary, Bad Working Conditions)

=> Theory X and Theory Y are two ways managers think about their employees:

- Theory X (Believing employees dislike work, avoid responsibility and only work for money or fear of punishment)
- Theory Y (Believing employees enjoy at work, are self-motivated and can be creative and solve problems)

=> McClelland's Three-Need Theory explains that people are motivated by three main needs:

- Achievement (desire to accomplish goals / be successful)
- Power (desire to influence others / have control)
- Affiliation (desire to build relationships / be liked)

=> Contemporary Motivation theories focus on understanding what drives people at work, addresses individual differences. Includes:

- Job Design Theory: Rotation: Changing Task to help you learn new things
Enlargement: Adding similar level tasks
Enrichment: Adding Challenges.
- Goal Setting Theory: Setting Clear and Challenging goals can help in better Performance.
- Reinforcement Theory: Actions influenced by rewards / punishments you get.
- Equity Theory: Motivation influenced by how fair you think things are compared to others.
- Self-Determination Theory: Motivation influenced by choosing tasks freely, not forced.

(By Albert Bandura)

- Self-Efficacy Theory: Believing in yourself boosts your effort.

Ways to increase Self-Efficacy:

- Gaining Experience
- Watching Others Succeed
- Getting Appreciation
- Feeling emotionally ready.

- Expectancy Theory: Motivation is based on three beliefs:

- Effort (Believing your effort will lead to good performance)
- Reward (Believing your performance will lead to reward)
- Growth (Believing your reward will help you reach personal goals)
